

# Dwyer Case History

**Project Name:** Pump Station Hardening  
**Owner:** South Florida Water Management District  
**Engineer:** TYLIN International  
**Project Type:** Concrete Restoration / Reinforcing using Shotcrete  
**Location:** Lake Okeechobee, FL

## Project Description:

Dwyer had to strengthen 12,000 sq ft of the existing concrete to protect the building from potential hurricane damage. Dwyer applied a 4" shotcrete cover on each of the vertical panels around the entire pump station. This job was successfully completed in April of 2005.

**Concrete Restoration / Reinforcing, Shotcrete**
