

Dwyer Case History

Project Name: Wilson Residence
Project Type: Foundation Repair
Helical Piles
Engineer: Jade Engineering - Structural
GeoTech: Building & Earth Sciences
Location: Helena, AL

Project Description:

This residential home settled approximately 2" – 4". Dwyer installed 39 exterior push piers and 39 interior helicals to lift and stabilize the foundation. Dwyer also provided slabjacking and pressure grouting. The house returned to a level condition and the project was completed in 7 days.
