

Dwyer Case History

Project Name: Coeburn Town Dump

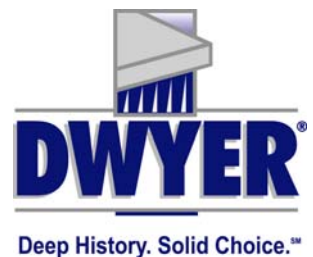

General Contractor: Kemron Environmental Services
Const Manager: EPA Environmental Protection Agency

Project Type: Void Fill, Pressure Grout, Rebar Stitching, Shotcrete

Location: Coeburn, VA

Project Description:

An existing shotcrete cap installed in 1996 had shifted, broken and sunk due to an earthquake in 2001. Dwyer designed, engineered and installed over 500 rebar stitches to repair the cracks while filling all voids underneath, and capping the site off with a new 6" shotcrete layer. The job was successfully completed on November 21, 2005.
