

Dwyer Case History

Project Name: Delaware Crossing
Owner: Aspen Square Management
Engineer: CDS Associates
Project Type: Stabilization of Foundation / Retaining Wall using Man Portable Rock Drill
Location: Independence, KY

Project Description:

Dwyer installed 64 Grouted Rock Anchors, and 64 Tie Back Anchors to successfully stabilize the foundation wall that was leaning 1"-3". Even though limited access and clearance were a major concern, Dwyer was able to successfully complete the job with no problems using their Man Portable Rock Drill.

**Foundation Stabilization using
Man Portable Rock Drill**
